

TECHNICAL DATA SHEET

BRASS HOSE BARB FITTINGS

Applications:

Brass hose barbs are recommended for general purpose air, water and other low pressure applications. CA360 brass construction prevents rust and corrosion. All hose barbs must be firmly fastened with hose clamps or ferrules.

Working Temperature:

•TEMPERATURE: -40°F to +220°F, -40°C to +104°C

Working Pressure:

Are hose size dependant.
