- For tough-to-reach locations
- Use Talon with:
 - Evap Foam No Rinse
For cleaning air conditioner evaporators
 - Blackhawk
For cleaning refrigeration coils in food processing areas
 - PenetrateHD
For applying penetrating lubricant in tough-to-reach locations

Description

The Talon Flexible Aerosol Wand is a specially developed 27 inch length accessory to be used exclusively with Nu-Calgon's Evap Foam No Rinse, Blackhawk and PenetrateHD aerosol products. The device provides precision spraying in tough-to-reach locations, especially when injecting product into a small opening. The reusable Talon is highly flexible yet has shape memory when navigating around equipment components or cabinetry to spray.

Application

The Talon is developed for Nu-Calgon's Evap Foam No Rinse and Blackhawk aerosol-based coil cleaners or applying Penetrate HD, a super penetrating lubricant, in tough-to-reach locations. The Talon Flexible Aerosol Wand provides precision spray control in field situations where it's simply difficult to fit/orientate the aerosol canister by itself around existing obstructions. In addition, with better spray control in tough-to-reach locations, there is less unwanted product waste on adjacent surfaces. The Talon is a must have service tool!

Directions for Use

This product must be used in accordance to the following directions by HVAC/R professionals only.

1. Wear protective eyewear and gloves.
2. Remove existing aerosol tip from the canister. Shake can well.
3. **IMPORTANT:** In a safe location, point Talon tip toward ground and assemble onto canister. A momentary discharge will occur.
4. Always remove Talon from aerosol canister when job is complete. Never transport while Talon is assembled to canister.

Talon is Great for:
