### SpillEX - Super Absorbent, Super Safe

- SpillEx takes care of the problem
- SpillEx is a disposable super-absorbing floor cloth that takes care of liquid spillages in minutes. One SpillEx absorbs and holds up to 1.2 L of water and up to 500ml of body fluids (urine) and it will not drip when lifting and moving, as SpillEx transforms the liquid spill into a gel.
- SpillEx is the ideal problem solver where you need to absorb liquid spillages, before the actual floor cleaning takes places. No risk of cross-contamination and no risk of soiling the bucket water with the spillage.

Weight per cloth	45 g
Size	51 x 37 cm / 21 x 14.5 in

## Understanding Fibers

### Horsehair

Horsehair is a natural fiber that comes from the tail or mane of a horse. The fiber is considered a soft to moderately stiff material that offers good texture and resilience. Horsehair withstands water and moisture and may be used pure or blended with other materials. The soft texture of the fiber makes it ideal for cleaning smooth floors. It is commonly used for scratchless cleaning of highly polished areas.

**Ideal For: Indoor Applications, Fine Dust Cleaning, Smooth Surface.**

### Polystyrene

Polystyrene is a synthetic fiber that is also known as "silver flagged". The fiber withstands moisture and has excellent wearing properties. When the ends are flagged, the styrene allows for more fine dust retention. Ideal for smooth surfaces and hardwood floors.

**Ideal For: Usage with many strong solvents.  
Can be used in temperatures of up to 180° F / 82° C**

### Tampico

Tampico is a natural fiber that is creamy white in colour, however, the fibers are dyed black. Tampico has a soft to medium texture with excellent durability. The fiber is water resistant with high heat, acid and alkaline resistant properties. Tampico is frequently mixed or blended with other materials to vary texture and properties. It is a good wearing and highly versatile fiber. Ideal for "all purpose" or medium sweeping.

**Ideal For: Wet or Dry Applications. Acid and alkaline resistant.**

### Nylon

Nylon is a synthetic fiber with excellent wearing qualities. Nylon is water resistant and won't absorb moisture, therefore discourages bacterial growth. Its high heat resistance and resistance to most acids enable the fiber to be long wearing and highly sanitary. Nylon is widely used in food service brushes due to its resilience and durability. It offers the highest quality and superior performance one requires in environments with high sanitary standards.

**Ideal For: Foodservice applications to meet the needs of high sanitary standards.**

### Polypropylene

Polypropylene is a synthetic fiber available straight or crimped in a variety of colours. The fiber is very light with excellent resilience to acid and most solvents. Polypropylene has poor recovery from crushing, however, it can be used in hot water and has good wearing properties.

**Ideal For: Usage with many strong solvents/acid and abrasive scrubbing.**

### Bassine

Bassine is a natural fiber that is obtained from the select and stiffer portions of the palmyra palm. It is the superior quality or the select grade of palmyra fiber. Bassine is both durable and water resistant, which makes it an ideal choice for stiff scrubbing applications.

**Ideal For: Outdoor usage where stiff scrubbing is required (wet and dry).**

## Lobby Dust Pans – Plastic and Metal

Our series of Lobby Dust Pans feature a large tray and a long aluminum handle.

The larger tray is able to hold more and features a better refined edge which is ideal for brushing in finer particles. Our lobby dust pan has been specially designed with a better angled slope which prevents dirt particles and liquid spillage from escaping once swept in. The longer lightweight aluminum handle allows for a more ergonomic usage and eliminates bending. We offer a choice of lobby brooms, from an angled to a poly toy broom. The choice is yours.

- Ideal for spot cleaning in any commercial, industrial and janitorial application, indoor or out.
- No bending necessary.
- The metal lobby dust pan is available in a rich black finish with a 30 cm / 12 inch self closing lid to prevent debris from spilling.

# WASTE MANAGEMENT

## Geo Waste Management Bins

The innovative and durable Geo metallic bin range is the center of your waste collection and recycling separation system, plus winners of the prestigious red dot design award – 2012. The ‘combined materials’ technology gives the durability and performance of plastic (easy to clean, fingerprint, dust and dentproof) with the aesthetics and image of stainless steel. The GEO range is available in two sizes with a choice of lids (handle, paper or color coded can) for waste separation. It can also be wall mounted for use in washrooms and areas where leaning under the bin is required, and they are easily removed for cleaning and emptying.

### Special Features

- Durable plastic construction with metallic finish
- Compact slim line design – fits also in the tightest spaces
- Rust, dent and fingerprint proof
- Easy to clean and washable
- TÜV certification on all bins and lids
- Can and paper lids are HACCP compliant
- Integrated handle – for easy carrying and lifting
- Integrated bag holder – ensures the correct fit of your waste bag
- Anti-slip rubber feet – avoids movement in use and protects flooring
- 2 sizes – 14.5 Gallons and 18.5 Gallons
- 4 lid options – handle, paper or cans with color coding
- Optional wall mounting kit contains 1 wall mounting bracket and open lid. Fits both sizes of bins and creates a secure, snug fit against walls
