ProComfort™ fan coils

The ProComfort™ fan coil series offers our best comfort in all seasons, from the highest featured Observer® communicating system to the budget-friendly, with available variable-speed or multi-speed ECM fan blowers.

What is a fan coil or modular blower?

KeepRite fan coils and modular blowers are designed for the best durability and comfort. The fan coil or modular blower is an indoor section that needs to be properly matched with an outdoor air conditioner or heat pump. The indoor and outdoor sections can be customized to provide air conditioning, heat pump heating, and/or electric heating.

Backed by exceptional warranties

The only No Hassle Replacement™ limited warranty that you'll find in the industry backs every KeepRite ProComfort product. It means comfort with no questions. We'll replace your unit if the evaporator coil fails within the covered period. We give you extra coverage in addition to a 10-year parts and compressor limited warranty.*

**To the original owner, KeepRite products are covered by a 10-year parts limited warranty upon timely registration. The limited warranty period is 5 years if not registered within 90 days of installation. Jurisdictions where warranty benefits cannot be conditioned on registration will automatically receive a 10-year parts limited warranty. See warranty certificate for complete details.*

What matters in a fan coil or modular blower?

Get the most out of an indoor section by choosing the fan coil or modular blower that fits your comfort needs. All of our fan coils and modular blowers include comfort enhancing and durable features to deliver lasting performance. For the maximum combination of comfort, efficiency and convenience, ask about our Observer® communicating system models with Wi-Fi® capability. For greater efficiency in a unit, look for variable-speed ECM fan blowers. Our No Hassle Replacement limited warranty is offered on our premium products to give you peace of mind. KeepRite fan coils and modular blowers offer efficiency, increased comfort, durable performance, and quiet operation.

Efficiency ratings—what do they mean?

Seasonal Energy Efficiency Ratio (SEER)—Measures the cooling efficiency of air conditioners and heat pumps during an average cooling season. The higher the SEER, the greater the energy economy.

Heating Seasonal Performance Factor (HSPF)—Measures the heating efficiency of heat pumps. The higher the HSPF, the greater the efficiency and energy savings potential during heat pump heating.

Energy Efficiency Rating (EER)—Measures the cooling efficiency of air conditioners and heat pumps during a set temperature (95° F).

ENERGY STAR®—A U.S. Environmental Protection Agency program to identify and promote energy-efficient products in order to reduce energy consumption.

Annual Fuel Utilization Efficiency (AFUE)—Measures the heating efficiency of a gas furnace. The higher the AFUE, the greater the gas heating efficiency and energy savings potential.
